

**"BETTER QUALITY,
BETTER AVAILABILITY"**

OIL FILTER

*Prevent dirt particles from entering the engine compartment.
The main function is to filter all kinds of impurities from the oil.*

FUEL FILTER

*Filter impurities, avoid clogging, protect other components,
engine stability, and improve vehicle safety.*

AIR FILTER

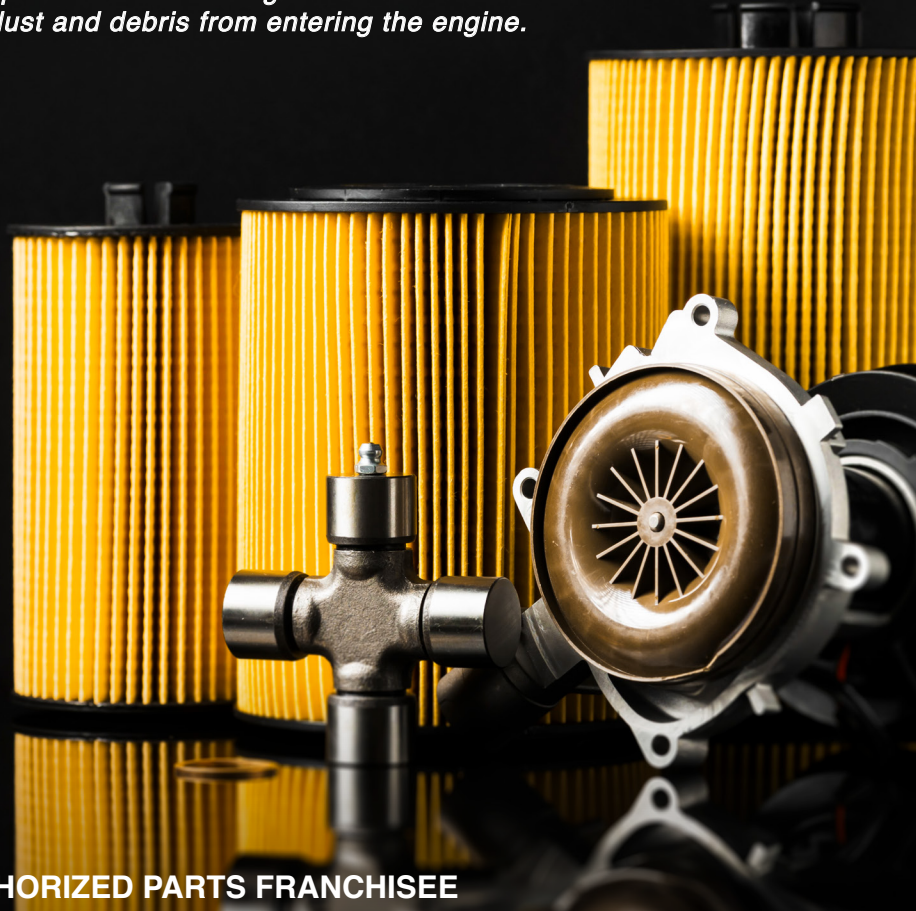

*Component that is responsible for filtering the air into the
engine and preventing dust and debris from entering the engine.*

Weichai Genuine Parts, There Is A Difference

*Ensure your equipment runs at its best by
giving your filter elements the proactive
care they need every 250 hours.*

*Regular maintenance ensures smooth
operations, boosts efficiency, and
prevents costly breakdowns.*

*Keep your equipment at its peak
performance!*
